Capability Statement

Core Competencies – Privateer IT provides:
- Datacenter Consolidation
- Migration of Virtual and Physical Assets
- Cloud & Virtualization Design and Installation
- COOP/DR
- System and Software Testing
- Staff Augmentation

Past Performance – EMF Contract Value $39.5M. Privateer IT, as a key subcontractor, drove the task to implement a centralized framework to monitor VA's complex IT systems and processes across multiple disciplines and increase accountability across the enterprise. Privateer IT provided enterprise architecture design, virtualization/ COOP/DR design & deployment as well as contributing too other facets of the EMF system including physical and virtual system migration.

This initiative has the following specific, high-level objectives:
- Architect/deploy a first of its kind solution in the VA to include, Network, Security and monitoring across a Multi-state geography
- Develop/deploy site recovery of physical and virtual assets to allow for a RTO of less than 1 hour between the Primary and Backup sites
- Develop/deploy Full monitoring suite across VA utilizing CA, BMC and IBM to ingest, normalize and report on disparate data points
- Multi-site migration of physical and virtual assets from commercial space to VA datacenters

Differentiators
- PRIVATEER IT has experience providing technical design and support services in VA and DoD. Privateer IT brings 22 years of IT experience at the enterprise level in commercial and government agencies to the company
- SMEs experienced in the federal government located in Melbourne, Florida, allows Privateer IT to provide qualified staffing at lower rates than our DC competitors
- Long term trusted advisor with VA technical staff
- Privateer IT excels at meeting requirements in a timely, responsive, and cost efficient manner
